DETAILED ACTION

Applicants preliminary amendment filed August 17, 2004 has been received and entered. Claims 1-13 have been cancelled and new claims 14-52 have been added. Consequently, claims 14-52 are pending in the instant application.

Specification

1. The disclosure is objected to because of the following informalities: Applicants continuing data statement recites parent application 08/466,698 as "pending." However, this application is now abandoned. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 14-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite in the recitation of can not spread "substantially" within infected cells and can not spread "substantially" from infected to uninfected cells. One of skill in the art would be unable to determine the metes and bounds of the claimed invention. For instance, what level of spreading is permitted to qualify as not substantial? Similarly, at what level does it exceed the threshold to be deemed substantial? Without a clear definition as to the metes and bounds of the term "spread substantially" one of skill in the art would be unable to determine the metes and bounds of the claimed invention.

Art Unit: 1645

3. Applicants Declaration by Dr. Alonso has been received and is sufficient to remove any potential 35 USC 103 rejection as was applied in parent application 08/466,698.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 14-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 5,762,941. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims encompasses modified *Shigella* strains having a mutated *icsA* gene.
